

A

source authority
(fact type, role)

T

temporal consistency
(event vs. chronology)

X

cross-source
corroboration

E

extraction
reliability

$$C = w_A \cdot A + w_T \cdot T + w_X \cdot X + w_E \cdot E$$

weights configured per deployment, $w_A + w_T + w_X + w_E = 1$

Rank candidates by C; take C1, C2

$C1 \geq \tau$ and
 $(C1 - C2) \geq \delta$?

Retain / mark
unresolved

no

yes
